

XM6

Prestige XM6 system is built using a very unique half-diamond fiber design with 5 ridges built into the fiber for proper resilience. These best-in-class monofilament fiber has been engineered to provide excellent durability and is part of a system designed to deliver a long-lasting, high performance surface for a variety of sports.

Durability without compromise. It's part of FieldTurf's DNA.

280 MICRONS
80 microns thicker than previous XM4 fiber and also above the standards of the industry

HALF-DIAMOND SHAPE

5 BUILT-IN RIDGES
strategically placed for added durability

THE CONCEPT Polymer - Process - Geometry

<p>POLYMER Excellent polymer contributing to superior durability and softness</p>		<p>PROCESS Precise and lengthy manufacturing process for world-class quality</p>
	<p>GEOMETRY A unique shape designed for proper resilience and durability</p>	

MONOFILAMENT FIBER

Prestige XM6 was developed with strict adherence to the 3 pillars of fiber development - Polymer, Process, and Geometry (PPG). The result is an exceptionally resilient and soft fiber that has been designed to provide excellent long-term durability.

TWO-LAYERED INFILL

Prestige XM6 features a two-layer infill comprised of ballast layers of sand and top layers of recycled rubber granules for proper shock absorption and worldclass performance.

TURF BACKING

Prestige XM6 features a dimensionally-stable backing that is coated and perforated at FieldTurf's manufacturing facility. The result is an exceptional tuft bind strength along with excellent drainage characteristics.
